Eval. Notes:	Custom Laminations Inc. ("CLI") laminates paper-to-fabric and/or paper-to-vinyl to make various textiles products that require water-repellent materials and coverings. CLI uses water-based adhesive in its lamination process. CLI also does commercial digital printing. The one-story building houses offices, prep area, winding fabric roll area, adhesive coating drum storage, production area, digital printing room and wash/cleaning area. CLI generates Conditionally Exempt Small Generator (CESQG) amounts of non-acute hazardous waste from cleaning the digital printer. CLI generates Waste spent isopropanol solution (D001) from cleaning the digital printer. CLI has generated 1/3 of 55-gallon drum since 3/25/15. According to Silverstein, the production operations remain the same since the last inspection. He explained that the pan that collects "adhesive drippings" during lamination is cleaned using water. The excess adhesive in the pan is removed and re-used. The wastewater is filtered to remove the solids and then discharged to Passaic Valley Sewerage Commissioners. The filtrate (solids) is disposed in the regular garbage. The last hazardous waste (RCRA) inspection conducted by this office occurred 5/16/12. No RCRA violations were noted during this inspection. As part of this report, details on this compliance inspection are described on subsequent checklists.

Eval. Notes:	CESQG COMPLIANCE INSPECTION MEMORANDUM Date of Inspection: May 15, 2012 Facility: Custom Laminations Inc Location: 932 Market Street, Paterson City, Passaic County 07513 USEPA ID #: NJR000022996 Custom Laminations Inc. is a CESQG of hazardous waste generated from the printing press operation of wallpaper design printing. Custom Lamination laminates paper to fabric and/or paper to vinyl material for various textiles products, including industrial wallpaper, window shades and other types of industries requiring vinyl and material for their products. The current adhesives are water-based and do not require solvent for their products. The primary wastes and waste codes generated are D001 flammable liquids/solids. In the past, the adjoining company, Microseal Coating & Laminating, operated together; however, the two companies no longer share the same laminators and thus the waste generated by Custom Lamination is no longer hazardous. Microseal have its own EPA Id number and only shares warehouse space. The hazardous waste 180-day accumulation area and one satellite accumulation drum was inspected and found no deficiencies. Custom Laminations recycles paper and cardboard. Pallets are disposed of as garbage. Universal Wastes including fluorescent light bulbs, batteries, electronics, and other universal waste streams are managed in accordance with the Universal Waste regulations. The previous RCRA inspection was performed in August 2009 at which time the facility was found in compliance with RCRA regulations. At this time, the facility was found in compliance with the RCRA rules and regulations. M.P.K.											

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.
